

## Daily Scrum or Standup Meeting

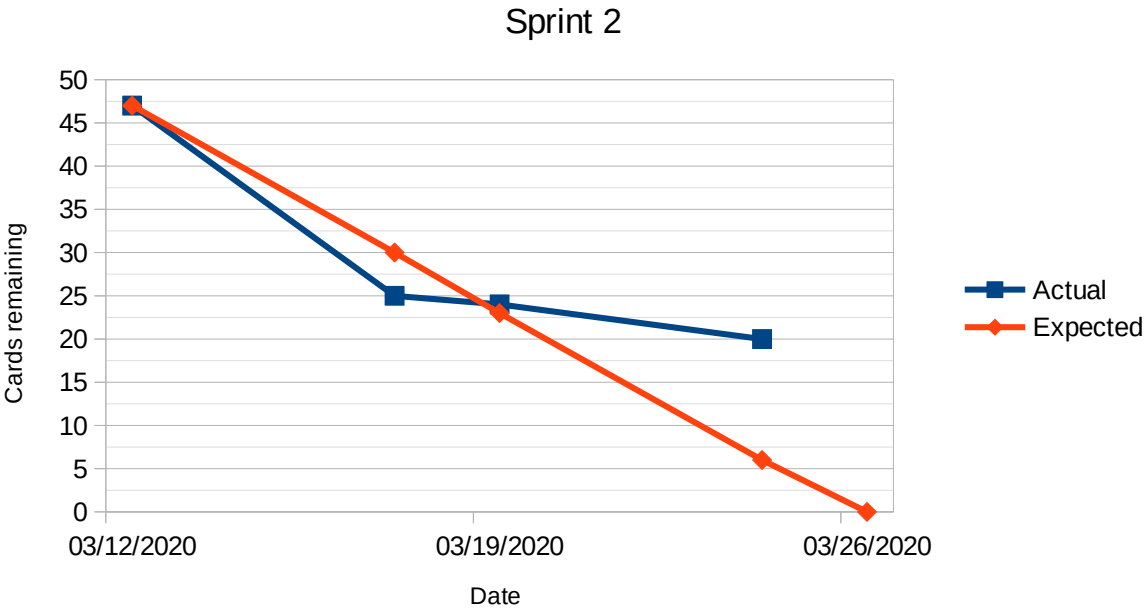

Team name: \_\_\_Alpha (Team 6)\_\_\_

Scrum Master: \_\_\_Avery\_\_\_

Date: \_\_\_3/24\_\_\_

Team Member	What did you do since the last scrum?	What do you plan to do before the next scrum?	What obstacles do you have?
Avery	looking into notifications	add getAuction to item, check the bidder changes	
Laurel	worked with jaden with structure of Signup	work on 'getting login going', generate report for admins	
Kai	looked up some stuff on live notification systems	work on doing Bid stuff and fixing parameter changes for the authentication system, find out how to test 300 concurrent users	we switched the Bidder stuff, broke all the unit tests
Cole	fixed the timer, added bootstraps, switched to passphrase	implement making bids, move the header, dynamic password verification	
Jaden			

# Burndown

# Screenshot of your project board

The screenshot shows a GitHub Project Board for the repository 'Utah State University Computer Science 3450'. The board is organized into five columns: Product Backlog, Sprint Backlog, In Progress, Needs Review, and Done. Each column contains a list of tasks, each with a title, a link to the repository, and a status label (e.g., Small, Medium, Large).

**Product Backlog (6 items):**

- allow users to reset their password if they forget (Repo-2.6#89 opened by KaiJameson)
- Test the ability to have 300 concurrent bidders (Repo-2.6#36 opened by KaiJameson)
- Create the ability to have multiple auctions (Repo-2.6#34 opened by KaiJameson)
- Link the action of being outbid to a notification to the previous highest bidder on an item (Repo-2.6#33 opened by KaiJameson)
- Link the end of the timer to notifying winners that they won an item (Repo-2.6#28 opened by KaiJameson)
- Create a notification system (Repo-2.6#27 opened by KaiJameson)

**Sprint Backlog (20 items):**

- add getAuction to Item (Repo-2.6#118 opened by AveryBolingbroke, Small (<1 day))
- Make init clear out database & populate with more stuff (Repo-2.6#115 opened by blazerunner44, Small (<1 day))
- Create a page that shows the bidder all the items they have bid on (Repo-2.6#47 opened by KaiJameson, Small (<1 day))
- Create unit test to verify the ability to bid on an item (Repo-2.6#50 opened by KaiJameson, Small (<1 day))
- unit test to verify item can handle if no one bid on it before end of auction (Repo-2.6#74 opened by KaiJameson, Small (<1 day))

**In Progress (2 items):**

- unit test to verify that check password meets our password requirements (Repo-2.6#85 opened by KaiJameson, Small (<1 day))
- create functionality to allow a user to create an account (Repo-2.6#103 opened by AveryBolingbroke, Medium (1 day))

**Needs Review (0 items):**

**Done (27 items):**

- Implement Django user authentication system (Repo-2.6#100 opened by AveryBolingbroke, Large (2 days))
- Add a star button to each item on the auction page to add the item to favorites (Repo-2.6#45 opened by KaiJameson, Small (<1 day))
- Add a favorites option to categories (Repo-2.6#46 opened by KaiJameson, Small (<1 day))
- Put header into its own file (Repo-2.6#62 opened by buhmancole, Small (<1 day))
- Fix native datetime on init (Repo-2.6#107 opened by blazerunner44, Small (<1 day))
