

Daily Scrum or Standup Meeting

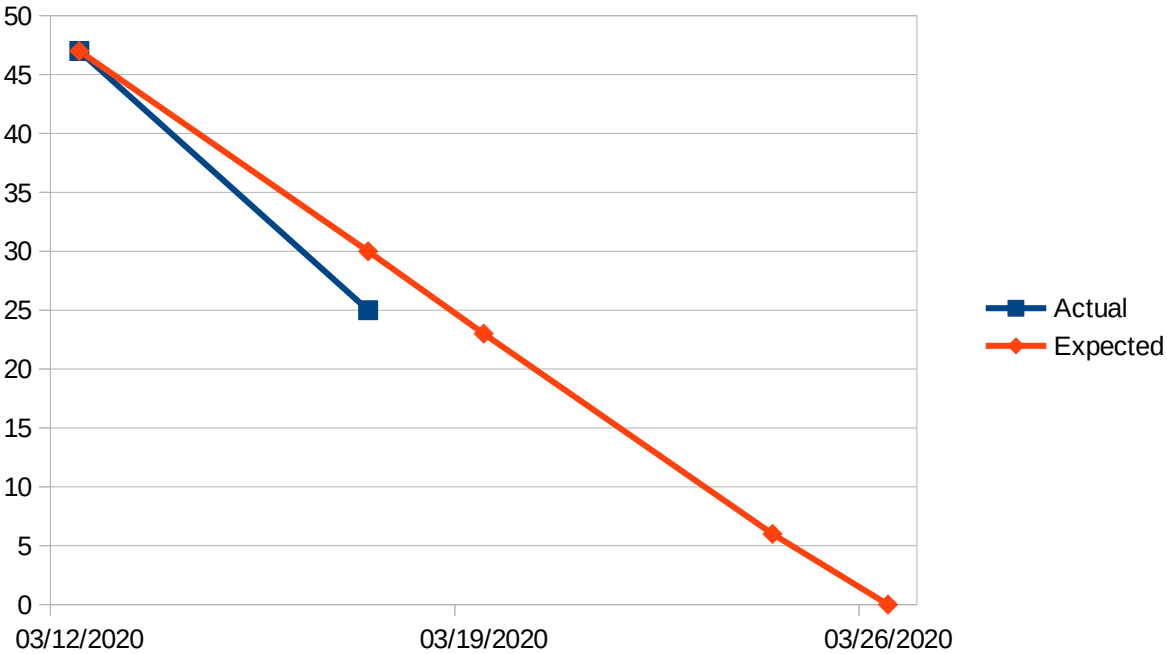

Team name: Alpha (Team 6)

Scrum Master: Avery

Date: 3/17

| Team Member | What did you do since the last scrum? | What do you plan to do before the next scrum? | What obstacles do you have? |
|-------------|---|--|--|
| Avery | fixed a bunch of models | django authentication also unit tests pass | unit tests are freaky |
| Laurel | Written up a profile page and a sign up page (not super in depth great) | clean things up, start working on user authentication | doesn't know how django works properly |
| Kai | Wrote a bunch of unit tests (Auction, bidder) Wrote script for automating migrations and testing | Need to write unit tests for auction, more more more unit tests Password requirements. | Jaden fixed time problems |
| Cole | upload the blank pages | at least half the cards | waiting on other pages from laurel |
| Jaden | relationship filter, fixed date time issue | create endpoints | people getting work |

Burndown

Screenshot of your project board

The screenshot shows a GitHub Project Board for the repository 'Utah State University Computer Science 3450'. The board is organized into columns: Product Backlog, Sprint Backlog, In Progress, Needs Review, and Done. Each column contains task cards with titles, descriptions, and estimated completion times. The 'Sprint Backlog' column is currently active, showing a list of tasks with their respective priorities and due dates. The 'In Progress' column shows tasks that are currently being worked on. The 'Needs Review' column is empty. The 'Done' column shows completed tasks. The board is updated 35 minutes ago.

Project 2.6 Updated 35 minutes ago

Product Backlog

- allow users to reset their password if they forget (Repo-2.6#89 opened by KaiJameson)
- Test the ability to have 300 concurrent bidders (Repo-2.6#36 opened by KaiJameson)
- Create the ability to have multiple auctions (Repo-2.6#34 opened by KaiJameson)
- Link the action of being outbid to a notification to the previous highest bidder on an item (Repo-2.6#33 opened by KaiJameson)
- Link the end of the timer to notifying winners that they won an item (Repo-2.6#28 opened by KaiJameson)
- Create a notification system (Repo-2.6#27 opened by KaiJameson)

Sprint Backlog

- create functionality to allow a user to create an account (Repo-2.6#103 opened by AveryBolingbroke, Medium (1 day))
- implement Django user authentication system (Repo-2.6#100 opened by AveryBolingbroke, Large (2 days))
- Create a page that shows the bidder all the items they have bid on (Repo-2.6#47 opened by KaiJameson, Small (<1 day))
- Create unit test to verify the ability to bid on an item (Repo-2.6#50 opened by KaiJameson, Small (<1 day))
- unit test to verify item can handle if no one bid on it before end of auction (Repo-2.6#74 opened by KaiJameson, Small (<1 day))

In Progress

- Put header into its own file (Repo-2.6#62 opened by buhmancole, Small (<1 day))
- unit test to verify that check password meets our password requirements (Repo-2.6#85 opened by KaiJameson, Small (<1 day))
- Add a favorites option to categories (Repo-2.6#46 opened by KaiJameson, Small (<1 day))
- Add a star button to each item on the auction page to add the item to favorites (Repo-2.6#45 opened by KaiJameson, Small (<1 day))
- pass unit tests (Repo-2.6#110 opened by AveryBolingbroke, Medium (1 day))

Needs Review

Done

- Fix native datetime on init (Repo-2.6#107 opened by blazerunner44, Small (<1 day))
- Fill in getBidders and getItems on Auction model (Repo-2.6#106 opened by blazerunner44, Small (<1 day))
- Add in a favorites list to the users (Repo-2.6#53 opened by blazerunner44, Small (<1 day))
- remove length restraint on item description (Repo-2.6#95 opened by AveryBolingbroke, Small (<1 day))
- unit test to verify that auction has passphrase (Repo-2.6#77 opened by KaiJameson, Small (<1 day))

Automated as Done Manage
